KSA: ABILITY TO TEACHING IN INSTRUCTIONAL PROGRAMS AND CLASSROOM LEARNING AND ACTIVITIES: describe experience, education and/or training that demonstrate their ability to provide assistance to teachers and other professional educators in providing quality education to assigned students

I worked as a Teacher in the Department of Education since August 1996 to December 2006. I taught courses on geometry, engineering draftsmanship and other technical subjects. In many occasions I provided individual tutorial to student with learning problem or to students who did not understand the lessons. For example, I prepared special lesson for one of the students who had a condition of autism. I organized and made arrangements to have at least two field trips per semester, in order to have a live experience in the use of technical equipment related to the courses taught. I coordinated and prepared trainings on self-help improvement techniques, as preparation for resumes, job interviews, and safety in the work environment.

As a Graduate student of Technology of Education I received training in a lot of teaching skills and the use of technology in the classroom. I assisted other teachers, students and administrative personnel in the preparation of presentations and the use of technology. During my work as coordinator for a community program, I planned and offered tutorials to kids and parents on the use of computers and assisted them in preparing homework.

I am a licensed teacher certified in the Department of Education of Puerto Rico. My certification number is 908337.
